KARIM MOHAMED HANFY ABDEL GAWAD

Programmer and technical innovator, passionate about machine learning and artificial intelligence.

kimoelshamy09@gmail.com | +201090514371 | El shorouk - Cairo

ABOUT ME

A young developer from Giza Governorate, living in Cairo, I work on building websites, applications, and projects based on artificial intelligence and modern technologies. I aspire to harness programming to serve the Arab world and always strive to provide innovative technical solutions. I have a great passion for self-learning, building real-world projects, and developing intelligent programming languages. I have a 3-year experience in website development.

EDUCATION

Online self-education

- Study web development and artificial intelligence from open sources like Coursera and YouTube

- Build real-world projects in JavaScript, Node.js, React, and more.

- I study in a secondary school - second year of secondary school | Cairo - Shorouk City

PROFESSIONAL EXPERIENCE

QUICK RECIPE WEBSITE APP PROJECT

- An intelligent web application that suggests recipes based on the user's available ingredients.

- A simple and fast interface. – Powered by AI models from OpenAI, Gemini, and DeepSeek.

- Integration with the YouTube API to display cooking videos.

- Filter results by genre, time, and taste. – Technologies: HTML, CSS, JavaScript, Node.js, Replit, OpenAI, DeepSeek, Gemini, YouTube API.

SELFY WEB APP

A personal profile building site for young people, showcasing their skills, projects, and profile links. Fully responsive design with night support.

The ability to share your profile with a unique link.

Details: React – Tailwind CSS – Node.js – Replit
